Dear FCC,

I am writing to plead against the case of Light Squared Subsidiary from obtaining a license to begin their work. Independent test have showed that interference with high-precision GPS will occur if they are allowed to go forward. The surveying industry will be harmed, but so will the hundreds of thousands of people who use the data surveyors produce. As a local government entity surveying rights of way and easements, it is vital that we strive to maintain a high level of accuracy. Losing this precision sets us back in the profession and the country as a whole. Please to not allow this decision to go forward.

Thank you,  
Chris Peters
